

Ingenico Cleaning Cards

Ingenico terminals are sophisticated communication devices used for transmitting business transactions from the purchase point to financial institutions around the globe. These transmissions need to happen quickly and correctly, without being hampered by air pollutants, dirt, oils and other contaminants that inevitably migrate into the card readers. These contaminants inhibit the reader's contact mechanisms from coming in complete contact with the credit card. The Ingenico Cleaning Card was developed as an easy and effective means of quickly removing these contaminants safely from the card reader's read mechanism. The Ingenico Cleaning Card is the only cleaning card approved for use on all Ingenico terminals.

ingenico®

Ingenico Cleaning Cards

Benefits of using a cleaning card

The Ingenico Cleaning Card is designed specifically to remove pollutant buildup from the read mechanisms of all types of Ingenico terminals. When this build up is regularly removed, as a preventive maintenance regimen, it will aid in:

- Prolonging the life of the card reader
- Reducing keystroke errors from sticky keys
- Reducing manual entries
- Maintaining the speed and efficiency of the terminal
- Maintaining customer satisfaction

How to use a cleaning card

The best characteristic of the Ingenico Cleaning Card is its simplicity to use. The Waffletechnology features, along with the solution on the card, perform the function of cleaning away the pollutants that are inserted into the reader and begin to build up every time a credit card is used. Once the cleaning card is removed from the pouch simply:

- Insert the cleaning card into the smart card or chip and pin reader slot as you would a credit card
- Remove the cleaning card, flip it end-to-end and reinsert it to remove any remaining contaminants
- Use the same card in the swipe reader by simply swiping it through as you would a credit card
- Flip the card over and run the cleaning card through the swipe reader a second time to remove any remaining contaminants

Where to buy

The Ingenico Cleaning Card is available directly through Ingenico or one of their many resellers. Availability may be subject to reseller's participation in this preventive maintenance program, so please ask your vendor about this product.
